conducted at MMH devotion Hall at 3 pm. for Late Mr. Sanjay Ramswami, who met with an accident on 20<sup>th</sup> June 2022. The celebrations for anniversary program were cancelled in honor of late Mr. Sanjay Ramaswamy.

### **Innovation in Nursing and Midwifery Education and Research Part - II**

Massive Open Online Courses (MOOCs) are recent innovative additions to the online learning landscape. MOOCs are online courses that are accessible through the Website, and open to registration generally without limits on numbers or prerequisites. MOOCs are offered in many different learning modalities and generally the students register online. The course materials are free of charge and incorporate various teaching strategies during the educational process Use of Simulation. Nurses and Midwives are expected to correlate theory and practice. Innovative methods such as simulation are used to assist students to have practical skills in a safe environment without fear of hurting the patient. The use of simulation in nursing and midwifery is well accepted and adopted worldwide. Highly technically advanced manikins and simulated patients are used, giving students a safe, realistic environment to learn new skills and become proficient in their skills set through realistic practice. The students may make errors, and the simulation tools or the simulation educational staff will be able to correct and guide the student in the use of proper evidenced-based practice modalities and interventions without increased risk for the patient or stress for the student here are different types of simulators including standardized live patients, human patient simulators, full mission simulators, and complex and simple trainers. Training is needed for nurse educators to be able to cope with the new technology and changes happening around them; as it is critical that educators be competent in the use of

simulation and in- corporate this in their curriculum and educational planning. These skills may be obtained online; however institutions have an obligation to prepare their faculty. The success of simulation as an innovative mode of instruction lies with proper planning of simulated scenarios, the ability to use cost effective simulation, training of the nurse educators in the use of simulation and support from the institution.

### **Embracing Technology in a Community Oriented Primary Care Outreach Program**

In line with the primary health care engineering approach, a new innovation method is used to enable communities to have access to health care, using the community oriented primary care (COPC) out- reach program concept. A community is divided into "wards" and the project is referred to as Ward Based Outreach Team. Wards are composed of a number of heads of households and community health care workers are assigned to those wards. The community health worker is the primary care provider for the families in these respective households. Retired nurses are used to supervise the community health workers. Students from different disciplines such as medicine, nursing, occupational therapy, and physiotherapy visit these sites for learning opportunities. The teams communicate via electronic records; personal electronic devices, such as mobile phones and tele-health may be utilized. The community health care workers visit families and assess the health status of each community member. They then input the data electronically using mobile phones, and the data is captured and compiled in a web based data platform.

### **Staff Birthdays for the month of July 2022 :**

1. Mrs. Lata Bhoyar : 1/7/2022
2. Mrs. Meena Lilhare : 15/7/2022
3. Mr. Christopher Waidande : 22/7/2022
4. Mrs. Surekha Kohle : 30/7/2022

### **National & International Days for the month of July 2022:**

- |         |   |  |
|---------|---|--|
| July 18 | - | International Nelson Mandela Day             |
| July 26 | - | Kargil Vijay Diwas                           |
| July 28 | - | World Nature Conservation Day, Hepatitis Day |
| July 29 | - | International Tiger Day                      |
